## DEVELOPER

Motivated and results-driven developer seeking a challenging position within a dynamic organization as a React and Node.js Developer. Offering a strong foundation in front-end development with React, back-end development with Node.js, API integration, and server management, with a proven ability to enhance user experience, improve system performance, and collaborate effectively within cross-functional teams.

## KEY COMPETENCIES

React Development	Server Management	State Management
Node.js Development	Version Control	Collaboration and Teamwork
Full Stack Development	Component-Based Architecture	Problem-Solving

## PROFESSIONAL EXPERIENCE

### Crase Sigma Empreendimentos Imobiliários

Sep 2023 - Present

#### Developer

- Developed interactive and responsive interfaces using Angular, enhancing user experience.
- Implemented business logic, integrated APIs, and developed reusable components, contributing to efficient project execution.
- Built and maintained robust and secure APIs with Laravel, achieving significant performance improvements through optimization techniques.
- Efficiently managed Apache2 server hosting for web applications.
- Led code versioning, managed merges, resolved conflicts, and ensured source code quality.
- Integrated legacy system data from COBOL into modern applications.
- Created responsive and stylish designs with Bootstrap and Tailwind, improving application usability.
- Maintained the Android and iOS application "Crase Sigma" using Ionic with Angular, ensuring consistent performance and user experience across platforms.

### CRR - Centro de Reciclagem Rio

Nov 2021 - Mar 2023

#### Administrative Apprentice

- Organized and maintained physical and electronic files, ensuring efficient document management and quick retrieval.
- Performed administrative tasks, including inventory control and report generation, enhancing operational efficiency.

## EDUCATION & CERTIFICATIONS

### Trybe | Web Development

Javascript / Typescript  
React / Next  
Node  
Test automation  
MySQL / Postgres  
Docker  
Python

## MAIN PROJECTS

### Chats • Next, Node | [Project Link](#), [Github Link](#)

- Implemented message persistence with Upstash-Redis and real-time communication with Pusher;
- Designed and built an intuitive, responsive UI using Tailwind CSS;
- Ensured robust data validation and handling using Zod and React Hook Form.

### Forum • React, Laravel | [Github Link](#)

- Utilized MySQL for database management and Docker for containerization, ensuring a consistent development environment;
- Designed responsive UI components with Tailwind CSS, enhancing user experience across devices;
- Deployed the application using docker-compose for seamless development and deployment.
